Abstracts

According to our (Global Info Research) latest study, the global Cement Slurry Spreader market size was valued at US\$ 541 million in 2025 and is forecast to a readjusted size of US\$ 686 million by 2032 with a CAGR of 3.2% during review period.

In 2025, the global production of cement slurry sprayers reached 15,033 units, with an average price of approximately US\$35,000 per unit. The global annual production capacity of cement slurry sprayers is approximately 20,000 units, with a gross profit margin of approximately 26.2%. Cement slurry sprayers are construction equipment used in road, bridge, and building projects, primarily for uniformly spraying cement slurry or mixtures to improve the adhesion and stability of the substrate. The upstream of the cement slurry sprayer industry includes high-pressure pumps, delivery pipelines, and power and transmission systems; the midstream consists of cement slurry sprayer manufacturers; and the downstream applications are mainly in the construction, mining, and warehousing industries.

The cement slurry sprayer market is currently in a phase of simultaneous demand-driven growth and technological upgrades. With increasing demands for automation, efficiency, and quality control in construction, the requirements for spraying accuracy, uniformity, material utilization, and operational safety are rising. The market is moving towards more efficient, intelligent, and low-emission equipment. Competition focuses on spraying uniformity, flow control, intelligent path planning, remote diagnostics and maintenance, and integration with on-site information systems. Meanwhile, fluctuations in raw material costs, limitations imposed by road transportation and construction environments, and adaptability to different climatic conditions also pose key challenges. Overall, with continued urbanization and infrastructure upgrades, cement slurry

sprayers are expected to achieve continuous improvements in capacity, accuracy, and intelligence, driving improvements in construction efficiency and project quality.
