In the centralized yarn warehouse type winding system, after the yarn is formed in the previous process such as the spinning machine, it will be centrally stored in the yarn warehouse. The automatic winding machine takes out the yarn from the yarn library and performs the winding operation. It connects the yarns on multiple yarn cones and winds them into larger spindles or cone-shaped yarns. It is suitable for large-scale spinning enterprises, especially For enterprises with a large variety of yarns and large production batches, production efficiency and product quality can be significantly improved through centralized management and automated winding.
