Abstracts

The global Centrifuge for Food market size is expected to reach \$ 2082 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032).

centrifuge for food refers to a specialized equipment used in food processing and beverage production processes, which relies on high-speed rotation to generate centrifugal force for solid-liquid separation, liquid-liquid separation, clarification, dehydration, concentration, slag removal, grading, and purification of materials. Common types include disc centrifuge, horizontal spiral centrifuge, basket centrifuge, tube centrifuge, scraper discharge centrifuge, and tripod centrifuge. It is mainly used in the fields of dairy products, juice, beer, wine, vegetable oil, starch, sugar industry, yeast, protein separation, seasoning, and fruit and vegetable processing. In 2025, global Centrifuge for Food Production production reached approximately 16,598 Units, with an average global market price of around US\$ 89,652 per unit.

The overall demand for centrifuges in the food industry is stable, with growth mainly coming from the automation transformation of food and beverage enterprises, the improvement of hygiene production standards, the upgrading of dairy and vegetable oil processing, the expansion of plant protein and functional beverage production, and the increasing demand from customers for low-energy, easy to clean, low residue, closed operation, and high stability equipment. The high-end market places greater emphasis on online cleaning, sanitary grade materials, automatic slag discharge, intelligent monitoring, and the ability to support the entire production process. In the future, the focus of competition will be on energy conservation, intelligence, sanitary design, low maintenance structures, and process adaptation capabilities. Manufacturers with food process understanding and full line integration capabilities are more likely to obtain high-quality orders.

This report studies the global Centrifuge for Food production, demand, key manufacturers, and key regions.
