Abstracts

The global Centrifuge Equipment market size is expected to reach \$ 18306 million by 2032, rising at a market growth of 3.2% CAGR during the forecast period (2026-2032).

Centrifugal equipment refers to industrial equipment that uses the centrifugal force generated by high-speed rotation to separate, concentrate, clarify, dehydrate, grade, and purify solid-liquid, liquid-liquid, liquid-solid, or granular materials. The core components usually include a drum, a screw conveyor, a drive system, a feeding system, a discharge system, a sealing system, a control system, and a safety protection system. The main types include horizontal spiral settling centrifuge, disc centrifuge, tube centrifuge, tripod centrifuge, scraper discharge centrifuge, pusher centrifuge, basket centrifuge, etc. In 2025, global Centrifuge Equipment production reached approximately 195,896 Units, with an average global market price of around US\$ 72,568 per unit.

Centrifugal equipment belongs to mature industrial separation equipment, but it is not a low growth traditional equipment, because its demand structure is shifting from a single dehydration and separation function to high efficiency, low energy consumption, continuity, intelligence, and customized system solutions. Environmental governance remains the most stable source of demand, with municipal sludge, industrial wastewater, sludge treatment, and chemical waste liquid treatment driving the high shipment volume of horizontal spiral centrifuges, while the food and beverage, pharmaceutical, and biotechnology fields place more emphasis on hygiene grade design, material cleanliness, sealing operation, and automatic cleaning capabilities, driving disc and tube centrifuge equipment to maintain high unit prices.

This report studies the global Centrifuge Equipment production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Centrifuge Equipment and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
