According to our (Global Info Research) latest study, the global Ceramic Bead market size was valued at USD 321.2 million in 2023 and is forecast to a readjusted size of USD 605.3 million by 2030 with a CAGR of 9.5% during review period.

Ceramic beads are made of zirconium oxide or zirconium silicate, with addition of aluminium oxide and silica, proportion of which is different in different product types. They may content some stabilizers, which greatly improve their properties. Particular types of beads have different characteristic and areas of application. Ceramic beads are made from an extremely tough zirconium oxide ceramic. They are iron-free and are therefore suitable for use with stainless steel and aluminium. The round shape of the ceramic beads means that they can be used for non-aggressive cleaning and for producing visually attractive surfaces.
