Abstracts

There are many advantages of ceramic grills vs. traditional grills. Cooking on ceramic is a totally different cooking experience. Ceramic grills have the ability to quickly heat to a much higher temperature which allows you to sear meats properly and then cook them at a lower temperature. The special dome shape and ceramic materials used in the construction of ceramic grills, allows for more efficient use of charcoal, and retains heat much better than traditional grills. This helps meat hold moisture, and opening the grill to add sauce or cheese to meats does not lower the temperature of the ceramic so cooking temperature resumes within about 30 seconds. Ceramic grills also cook from all sides, not just the bottom like traditional grills. Another advantage is, rather than having a traditional grill and a separate smoker, a ceramic grill combines grill, brick oven, and a smoker for direct or indirect cooking.
