Abstracts

According to our (Global Info Research) latest study, the global Ceramic Substrates for Probe Cards market size was valued at US\$ 151 million in 2024 and is forecast to a readjusted size of USD 278 million by 2031 with a CAGR of 9.0% during review period.

IC testing packages require increased size and greater precision in silicon wafer pad positioning to reduce the number of tests. These test tool ceramic packages are used in running electrical tests with probes (needles) brought into contact with IC (wafer) terminals. They are used as relay substrates to mechanically and electrically connect the probe and PCB in the probe card.

Thin film technologies are used to form high-precision terminals on alumina ceramic multilayer substrates of over 20 layers.

The future development trends of Ceramic Substrates for Probe Cards are mainly:

1. Higher test density

With the continuous advancement of integrated circuit (IC) technology, the integration of chips is getting higher and higher, especially the demand for system-on-chip (SoC), AI chips and high-performance computing chips has driven the increase in test density. Probe card substrates will need to support more probes (with higher probe arrangement density) to achieve comprehensive testing of chips. The substrate will develop towards higher precision and finer structures to meet this high-density testing demand.

2. More miniaturization and high integration

In order to adapt to modern electronic devices and high-density packaging technologies (such as 3D packaging, system-level packaging (SiP)), probe card substrates will tend to be miniaturized and highly integrated. This will not only reduce space occupancy, but also improve test efficiency. Miniaturization design will also make probe cards more suitable for portable and low-power devices.

3. Multifunctional integration

As chip testing requirements become more complex, substrates will not only play the role of mechanical support and electrical connection, but may also integrate more functions, such as temperature monitoring, humidity control, automatic adjustment, etc. For example, in high-power semiconductor testing, the substrate may need to integrate more heat dissipation technology or liquid cooling solutions to ensure test stability and accuracy.

4. Application of new materials

Ceramic substrates are still the mainstream material, but with the demand for higher efficiency and lower cost, composite substrates (such as ceramic and metal composites, ceramic and plastic composites) and glass substrates are expected to become new development directions. New materials will improve the thermal management performance, mechanical strength, corrosion resistance and signal transmission efficiency of the substrate, and help reduce production costs.

5. Automation and intelligence

As the semiconductor manufacturing and testing process develops towards intelligence and automation, the probe card substrate will be closely integrated with automated testing equipment and intelligent diagnostic systems to improve test accuracy, efficiency and reliability. The substrate may integrate intelligent control systems, such as real-time monitoring of temperature, pressure, and displacement, to optimize the test process and reduce manual intervention.

6. Cost optimization and domestic substitution

As the global semiconductor industry gradually moves towards localized production and domestic substitution, the production of probe card substrates will pay more attention to reducing costs. The rapid growth of the Chinese market may also prompt more local

manufacturers to invest in the research and development of probe card substrates, driving further cost reductions.

In terms of consumption, North America is currently the world's largest consumer market, accounting for 29.06% of the sales market share in 2024, followed by Japan and South Korea, accounting for 23.16% and 10.12% of the sales market share respectively. It is expected that in the next few years, the localization substitution and independent research and development process of China's semiconductor industry will accelerate, and the demand for probe cards in the domestic market will grow rapidly. With the development of domestic semiconductor equipment and material technology, localization substitution has become a trend of future development. The market for Ceramic Substrates for Probe Cards in China has the fastest growth, with a CAGR of approximately 17.00% during 2025-2031.

From the production side, the Ceramic Substrates for Probe Cardss are currently basically concentrated in Japan and South Korea, which are two important production areas, accounting for 67.03% and 28.68% of the market share in 2024 respectively. Due to the high monopoly of the semiconductor test probe card substrate market, the core technology is in the hands of Japanese and Korean companies. It is expected that Japan and South Korea will still firmly occupy the core position in the next few years. With the research and development results of Chinese company Shanghai Zefeng Semiconductor Technology on MEMS probes and Ceramic Substrates for Probe Cardss, more and more Chinese local companies will gradually increase their technology research and development and market penetration in the field of probe cards and substrates. It is expected that in the next few years, China will maintain the fastest growth rate, and the share is expected to reach 2.93% in 2031.

In terms of product types, 300mm Ceramic Substrates for Probe Cards occupy an important position. 300mm substrates are mainly used for testing high-end chips, high-density packaging and advanced processes, and are suitable for large-scale mass production. With the continuous advancement of chip manufacturing technology, 300mm substrates are becoming mainstream, especially in high-end processes and high-performance chip testing. It is expected that the market demand for 300mm substrates will continue to grow in the next few years. The sales market share of 300mm substrates in 2024 is 83.96%, and it is expected to reach 89.42% in 2031. At the same time, in terms of application, DRAM's sales share in 2024 is about 44.62%, and the CAGR in the next few years is about 13.72%.

From the perspective of manufacturers, semiconductor test probe card substrate

manufacturers are highly concentrated worldwide, and only a few can mass-produce and supply Ceramic Substrates for Probe Cards. The main manufacturers include Kyocera, SEMCNS Co., Ltd, Niterra (NTK), IMTech Plus, LTCC Materials, FINE CERATECH INC., Shanghai Zefeng Semiconductor Technology, etc. In 2024, the first-tier manufacturers in the world are mainly Kyocera, which has a market share of about 42.73%; the second-tier manufacturers are SEMCNS Co., Ltd and Niterra (NTK), which have a total share of 43.13%.

The future development of Ceramic Substrates for Probe Cards will be driven by multiple factors, mainly including the continuous evolution of semiconductor processes, innovation in packaging technology, the rise of high-performance computing and AI chips, and the increase in cost control and environmental protection needs. Future probe card substrates will tend to be high-density, high-integration, miniaturized, low-cost and multi-functional designs, and technological innovation will continue to drive semiconductor testing technology towards higher precision and higher efficiency. At the same time, with the advancement of domestic substitution, the Chinese market will also become a key driving force for the development of probe card substrates.

This report is a detailed and comprehensive analysis for global Ceramic Substrates for Probe Cards market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Ceramic Substrates for Probe Cards market size and forecasts, in consumption value (\$ Million), sales quantity (Units), and average selling prices (US\$/Unit), 2020-2031

Global Ceramic Substrates for Probe Cards market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (Units), and average selling prices (US\$/Unit), 2020-2031

Global Ceramic Substrates for Probe Cards market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (Units), and average selling prices (US\$/Unit), 2020-2031

Global Ceramic Substrates for Probe Cards market shares of main players, shipments in revenue (\$ Million), sales quantity (Units), and ASP (US\$/Unit), 2020-2025

The Primary Objectives in This Report Are:

- To determine the size of the total market opportunity of global and key countries
- To assess the growth potential for Ceramic Substrates for Probe Cards
- To forecast future growth in each product and end-use market
- To assess competitive factors affecting the marketplace

This report profiles key players in the global Ceramic Substrates for Probe Cards market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Kyocera, SEMCNS Co., Ltd, Niterra (NTK), IMTech Plus, LTCC Materials, FINE CERATECH INC., Shanghai Zenfocus, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Ceramic Substrates for Probe Cards market is split by Type and by Application. For the period 2020-2031, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type

Size: 300mm

Others Size: 200mm and 150mm

Market segment by Application

NAND Flash Memory

DRAM

Logic Devices

Others

Major players covered

Kyocera

SEMCNS Co., Ltd

Niterra (NTK)

IMTech Plus

LTCC Materials

FINE CERATECH INC.

Shanghai Zenfocus

Market segment by region, regional analysis covers

North America (United States, Canada, and Mexico)

Europe (Germany, France, United Kingdom, Russia, Italy, and Rest of Europe)

Asia-Pacific (China, Japan, Korea, India, Southeast Asia, and Australia)

South America (Brazil, Argentina, Colombia, and Rest of South America)

Middle East & Africa (Saudi Arabia, UAE, Egypt, South Africa, and Rest of Middle East & Africa)

The content of the study subjects, includes a total of 15 chapters:

Chapter 1, to describe Ceramic Substrates for Probe Cards product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top manufacturers of Ceramic Substrates for Probe Cards, with price, sales quantity, revenue, and global market share of Ceramic Substrates for Probe Cards from 2020 to 2025.

Chapter 3, the Ceramic Substrates for Probe Cards competitive situation, sales quantity, revenue, and global market share of top manufacturers are analyzed emphatically by landscape contrast.

Chapter 4, the Ceramic Substrates for Probe Cards breakdown data are shown at the regional level, to show the sales quantity, consumption value, and growth by regions, from 2020 to 2031.

Chapter 5 and 6, to segment the sales by Type and by Application, with sales market share and growth rate by Type, by Application, from 2020 to 2031.

Chapter 7, 8, 9, 10 and 11, to break the sales data at the country level, with sales quantity, consumption value, and market share for key countries in the world, from 2020 to 2025. and Ceramic Substrates for Probe Cards market forecast, by regions, by Type, and by Application, with sales and revenue, from 2026 to 2031.

Chapter 12, market dynamics, drivers, restraints, trends, and Porters Five Forces analysis.

Chapter 13, the key raw materials and key suppliers, and industry chain of Ceramic Substrates for Probe Cards.

Chapter 14 and 15, to describe Ceramic Substrates for Probe Cards sales channel, distributors, customers, research findings and conclusion.

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Market Analysis by Type

1.3.1 Overview: Global Ceramic Substrates for Probe Cards Consumption Value by Type: 2020 Versus 2024 Versus 2031

1.3.2 Size: 300mm

1.3.3 Others Size: 200mm and 150mm

1.4 Market Analysis by Application

1.4.1 Overview: Global Ceramic Substrates for Probe Cards Consumption Value by Application: 2020 Versus 2024 Versus 2031

1.4.2 NAND Flash Memory

1.4.3 DRAM

1.4.4 Logic Devices

1.4.5 Others

1.5 Global Ceramic Substrates for Probe Cards Market Size & Forecast

1.5.1 Global Ceramic Substrates for Probe Cards Consumption Value (2020 & 2024 & 2031)

1.5.2 Global Ceramic Substrates for Probe Cards Sales Quantity (2020-2031)

1.5.3 Global Ceramic Substrates for Probe Cards Average Price (2020-2031)

2 MANUFACTURERS PROFILES

2.1 Kyocera

2.1.1 Kyocera Details

2.1.2 Kyocera Major Business

2.1.3 Kyocera Ceramic Substrates for Probe Cards Product and Services

2.1.4 Kyocera Ceramic Substrates for Probe Cards Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2020-2025)

2.1.5 Kyocera Recent Developments/Updates

2.2 SEMCNS Co., Ltd

2.2.1 SEMCNS Co., Ltd Details

2.2.2 SEMCNS Co., Ltd Major Business

2.2.3 SEMCNS Co., Ltd Ceramic Substrates for Probe Cards Product and Services

2.2.4 SEMCNS Co., Ltd Ceramic Substrates for Probe Cards Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2020-2025)

- 2.2.5 SEMCNS Co., Ltd Recent Developments/Updates
- 2.3 Niterra (NTK)
 - 2.3.1 Niterra (NTK) Details
 - 2.3.2 Niterra (NTK) Major Business
 - 2.3.3 Niterra (NTK) Ceramic Substrates for Probe Cards Product and Services
 - 2.3.4 Niterra (NTK) Ceramic Substrates for Probe Cards Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2020-2025)
 - 2.3.5 Niterra (NTK) Recent Developments/Updates
- 2.4 IMTech Plus
 - 2.4.1 IMTech Plus Details
 - 2.4.2 IMTech Plus Major Business
 - 2.4.3 IMTech Plus Ceramic Substrates for Probe Cards Product and Services
 - 2.4.4 IMTech Plus Ceramic Substrates for Probe Cards Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2020-2025)
 - 2.4.5 IMTech Plus Recent Developments/Updates
- 2.5 LTCC Materials
 - 2.5.1 LTCC Materials Details
 - 2.5.2 LTCC Materials Major Business
 - 2.5.3 LTCC Materials Ceramic Substrates for Probe Cards Product and Services
 - 2.5.4 LTCC Materials Ceramic Substrates for Probe Cards Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2020-2025)
 - 2.5.5 LTCC Materials Recent Developments/Updates
- 2.6 FINE CERATECH INC.
 - 2.6.1 FINE CERATECH INC. Details
 - 2.6.2 FINE CERATECH INC. Major Business
 - 2.6.3 FINE CERATECH INC. Ceramic Substrates for Probe Cards Product and Services
 - 2.6.4 FINE CERATECH INC. Ceramic Substrates for Probe Cards Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2020-2025)
 - 2.6.5 FINE CERATECH INC. Recent Developments/Updates
- 2.7 Shanghai Zenfocus
 - 2.7.1 Shanghai Zenfocus Details
 - 2.7.2 Shanghai Zenfocus Major Business
 - 2.7.3 Shanghai Zenfocus Ceramic Substrates for Probe Cards Product and Services
 - 2.7.4 Shanghai Zenfocus Ceramic Substrates for Probe Cards Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2020-2025)
 - 2.7.5 Shanghai Zenfocus Recent Developments/Updates

3 COMPETITIVE ENVIRONMENT: CERAMIC SUBSTRATES FOR PROBE CARDS

BY MANUFACTURER

3.1 Global Ceramic Substrates for Probe Cards Sales Quantity by Manufacturer (2020-2025)

3.2 Global Ceramic Substrates for Probe Cards Revenue by Manufacturer (2020-2025)

3.3 Global Ceramic Substrates for Probe Cards Average Price by Manufacturer (2020-2025)

3.4 Market Share Analysis (2024)

3.4.1 Producer Shipments of Ceramic Substrates for Probe Cards by Manufacturer Revenue (\$MM) and Market Share (%): 2024

3.4.2 Top 3 Ceramic Substrates for Probe Cards Manufacturer Market Share in 2024

3.4.3 Top 6 Ceramic Substrates for Probe Cards Manufacturer Market Share in 2024

3.5 Ceramic Substrates for Probe Cards Market: Overall Company Footprint Analysis

3.5.1 Ceramic Substrates for Probe Cards Market: Region Footprint

3.5.2 Ceramic Substrates for Probe Cards Market: Company Product Type Footprint

3.5.3 Ceramic Substrates for Probe Cards Market: Company Product Application Footprint

3.6 New Market Entrants and Barriers to Market Entry

3.7 Mergers, Acquisition, Agreements, and Collaborations

4 CONSUMPTION ANALYSIS BY REGION

4.1 Global Ceramic Substrates for Probe Cards Market Size by Region

4.1.1 Global Ceramic Substrates for Probe Cards Sales Quantity by Region (2020-2031)

4.1.2 Global Ceramic Substrates for Probe Cards Consumption Value by Region (2020-2031)

4.1.3 Global Ceramic Substrates for Probe Cards Average Price by Region (2020-2031)

4.2 North America Ceramic Substrates for Probe Cards Consumption Value (2020-2031)

4.3 Europe Ceramic Substrates for Probe Cards Consumption Value (2020-2031)

4.4 Asia-Pacific Ceramic Substrates for Probe Cards Consumption Value (2020-2031)

4.5 South America Ceramic Substrates for Probe Cards Consumption Value (2020-2031)

4.6 Middle East & Africa Ceramic Substrates for Probe Cards Consumption Value (2020-2031)

5 MARKET SEGMENT BY TYPE

5.1 Global Ceramic Substrates for Probe Cards Sales Quantity by Type (2020-2031)

5.2 Global Ceramic Substrates for Probe Cards Consumption Value by Type
(2020-2031)

5.3 Global Ceramic Substrates for Probe Cards Average Price by Type (2020-2031)

6 MARKET SEGMENT BY APPLICATION

6.1 Global Ceramic Substrates for Probe Cards Sales Quantity by Application
(2020-2031)

6.2 Global Ceramic Substrates for Probe Cards Consumption Value by Application
(2020-2031)

6.3 Global Ceramic Substrates for Probe Cards Average Price by Application
(2020-2031)

7 NORTH AMERICA

7.1 North America Ceramic Substrates for Probe Cards Sales Quantity by Type
(2020-2031)

7.2 North America Ceramic Substrates for Probe Cards Sales Quantity by Application
(2020-2031)

7.3 North America Ceramic Substrates for Probe Cards Market Size by Country

7.3.1 North America Ceramic Substrates for Probe Cards Sales Quantity by Country
(2020-2031)

7.3.2 North America Ceramic Substrates for Probe Cards Consumption Value by
Country (2020-2031)

7.3.3 United States Market Size and Forecast (2020-2031)

7.3.4 Canada Market Size and Forecast (2020-2031)

7.3.5 Mexico Market Size and Forecast (2020-2031)

8 EUROPE

8.1 Europe Ceramic Substrates for Probe Cards Sales Quantity by Type (2020-2031)

8.2 Europe Ceramic Substrates for Probe Cards Sales Quantity by Application
(2020-2031)

8.3 Europe Ceramic Substrates for Probe Cards Market Size by Country

8.3.1 Europe Ceramic Substrates for Probe Cards Sales Quantity by Country
(2020-2031)

8.3.2 Europe Ceramic Substrates for Probe Cards Consumption Value by Country

(2020-2031)

8.3.3 Germany Market Size and Forecast (2020-2031)

8.3.4 France Market Size and Forecast (2020-2031)

8.3.5 United Kingdom Market Size and Forecast (2020-2031)

8.3.6 Russia Market Size and Forecast (2020-2031)

8.3.7 Italy Market Size and Forecast (2020-2031)

9 ASIA-PACIFIC

9.1 Asia-Pacific Ceramic Substrates for Probe Cards Sales Quantity by Type
(2020-2031)

9.2 Asia-Pacific Ceramic Substrates for Probe Cards Sales Quantity by Application
(2020-2031)

9.3 Asia-Pacific Ceramic Substrates for Probe Cards Market Size by Region

9.3.1 Asia-Pacific Ceramic Substrates for Probe Cards Sales Quantity by Region
(2020-2031)

9.3.2 Asia-Pacific Ceramic Substrates for Probe Cards Consumption Value by Region
(2020-2031)

9.3.3 China Market Size and Forecast (2020-2031)

9.3.4 Japan Market Size and Forecast (2020-2031)

9.3.5 South Korea Market Size and Forecast (2020-2031)

9.3.6 India Market Size and Forecast (2020-2031)

9.3.7 Southeast Asia Market Size and Forecast (2020-2031)

9.3.8 Australia Market Size and Forecast (2020-2031)

10 SOUTH AMERICA

10.1 South America Ceramic Substrates for Probe Cards Sales Quantity by Type
(2020-2031)

10.2 South America Ceramic Substrates for Probe Cards Sales Quantity by Application
(2020-2031)

10.3 South America Ceramic Substrates for Probe Cards Market Size by Country

10.3.1 South America Ceramic Substrates for Probe Cards Sales Quantity by Country
(2020-2031)

10.3.2 South America Ceramic Substrates for Probe Cards Consumption Value by
Country (2020-2031)

10.3.3 Brazil Market Size and Forecast (2020-2031)

10.3.4 Argentina Market Size and Forecast (2020-2031)

11 MIDDLE EAST & AFRICA

11.1 Middle East & Africa Ceramic Substrates for Probe Cards Sales Quantity by Type (2020-2031)

11.2 Middle East & Africa Ceramic Substrates for Probe Cards Sales Quantity by Application (2020-2031)

11.3 Middle East & Africa Ceramic Substrates for Probe Cards Market Size by Country

11.3.1 Middle East & Africa Ceramic Substrates for Probe Cards Sales Quantity by Country (2020-2031)

11.3.2 Middle East & Africa Ceramic Substrates for Probe Cards Consumption Value by Country (2020-2031)

11.3.3 Turkey Market Size and Forecast (2020-2031)

11.3.4 Egypt Market Size and Forecast (2020-2031)

11.3.5 Saudi Arabia Market Size and Forecast (2020-2031)

11.3.6 South Africa Market Size and Forecast (2020-2031)

12 MARKET DYNAMICS

12.1 Ceramic Substrates for Probe Cards Market Drivers

12.2 Ceramic Substrates for Probe Cards Market Restraints

12.3 Ceramic Substrates for Probe Cards Trends Analysis

12.4 Porters Five Forces Analysis

12.4.1 Threat of New Entrants

12.4.2 Bargaining Power of Suppliers

12.4.3 Bargaining Power of Buyers

12.4.4 Threat of Substitutes

12.4.5 Competitive Rivalry

13 RAW MATERIAL AND INDUSTRY CHAIN

13.1 Raw Material of Ceramic Substrates for Probe Cards and Key Manufacturers

13.2 Manufacturing Costs Percentage of Ceramic Substrates for Probe Cards

13.3 Ceramic Substrates for Probe Cards Production Process

13.4 Industry Value Chain Analysis

14 SHIPMENTS BY DISTRIBUTION CHANNEL

14.1 Sales Channel

14.1.1 Direct to End-User

14.1.2 Distributors

14.2 Ceramic Substrates for Probe Cards Typical Distributors

14.3 Ceramic Substrates for Probe Cards Typical Customers

15 RESEARCH FINDINGS AND CONCLUSION

16 APPENDIX

16.1 Methodology

16.2 Research Process and Data Source

16.3 Disclaimer

I would like to order

Product name: Global Ceramic Substrates for Probe Cards Market 2025 by Manufacturers, Regions, Type and Application, Forecast to 2031

Product link: <https://marketpublishers.com/r/GE717D30B5C0EN.html>

Price: US\$ 3,132.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
