According to our (Global Info Research) latest study, the global Ceramic Vacuum Switch Tube market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Vacuum switch tube, also known as vacuum arc extinguishing chamber, is an important part of vacuum switch. According to its use, it can be divided into load switch, contactor and special use. Most of the time, it is used on the circuit breaker. The vacuum switch tube used on the circuit breaker should have the performance of breaking the short circuit current, and can protect the circuit short circuit and electrical overload. The vacuum switch tube used for contactor shall be able to operate frequently under certain load current. The vacuum switch tube used for load switch has lower requirements. Generally, it only needs to break the rated working current. It often needs to be used together with the fuse. Vacuum switch tubes for special use are generally only used under certain conditions, and their specific requirements are related to the conditions of use.
