## Abstracts

According to our (Global Info Research) latest study, the global Cervical Screening market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

**Shift towards HPV Testing:** Human Papillomavirus (HPV) testing has gained prominence as an effective method for cervical cancer screening. HPV testing is often used in conjunction with or as a replacement for Pap smears due to its higher sensitivity in detecting high-risk HPV strains associated with cervical cancer.
