According to our (Global Info Research) latest study, the global Center Console Fishing Boats market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Center Console Boat is a type of single-decked open hull boat where the helm is in the center. The console of a boat is where all the controls are located, including steering, ignition, trim control, radio and other electronic devices, switches etc. It may have a small storage space and/or a head. In general there is no weather protection or berths, making the design ill-suited to cruising. The console may have a T-Top cover to provide limited relief from the sun and rain, but this is not universal because it interferes with fishermen's casting. Most center consoles are powered by outboard motors. A center console boat is popular as a yacht tender or ship's boat.
