Abstracts

According to our (Global Info Research) latest study, the global Cesium lodide market size was valued at USD 336 million in 2023 and is forecast to a readjusted size of USD 502.9 million by 2030 with a CAGR of 5.9% during review period.

This report studies the Cesium Iodide market, mainly focus on the caesium iodide crystals. The most important use of Caesium iodide. Caesium iodide (chemical formula CsI) is the ionic compound of caesium and iodine. It is often used as the input phosphor of an X-ray image intensifier tube found in fluoroscopy equipment. Caesium iodide photocathodes are highly efficient at extreme ultraviolet wavelengths. Cesium iodide is a scintillation material with a high gamma-ray stopping power due to its relative high density and effective atomic number. It is used either in its undoped form or doped with sodium or thallium for scintillation counting. CsI has not high resistance to thermal and mechanical shock due to the absence of a cleavage plane. Compared to NaI (TI) it is relatively soft and plastic material.

An important application of caesium iodide crystals, which are scintillators, is electromagnetic calorimetry in experimental particle physics. Pure CsI is a fast and dense scintillating material with relatively low light yield that increases significantly with cooling. It shows two main emission components: one in the near ultraviolet region at the wavelength of 310 nm and one at 460 nm. The drawbacks of CsI are a high temperature gradient and a slight hygroscopicity.

Europe is the largest producer of Cesium Iodide, with a market share nearly 50%. It was followed by Japan with 25%. Saint Gobain S.A., Amcrys, Hamamatsu Photonics K.K., Scintacor and Radiation Monitoring Devices, Inc. are the top 5 manufacturers of industry, and they had about 75% combined market share.

The Global Info Research report includes an overview of the development of the Cesium Iodide industry chain, the market status of Healthcare (CsI (TI), CsI (Na)), Industrial (CsI (TI), CsI (Na)), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Cesium Iodide.
