## Abstracts

The global CFRP Recycle market size is expected to reach \$ 521.1 million by 2029, rising at a market growth of 7.3% CAGR during the forecast period (2023-2029).

Global key players of CFRP Recycle include Carbon Conversions, Gen 2 Carbon, Mitsubishi (CFK Valley Recycling), Adherent Tech, etc. The top four players hold a share over 45%. Europe is the largest market, has a share about 45%, followed by North America, and Japan, with share 33% and 8%, separately. In terms of product type, Physical Process is the largest segment, occupied for a share of 97%, and in terms of application, Automobiles has a share about 40%.

CFRP (Carbon fiber reinforced plastics/polymer) are ideal lightweight structural materials for aerospace, automotive, energy and sports industries. CFRP Recycle is recycling CFRP from end-of-life parts and waste generated in the production process, such as scrap materials, out-of-date prepreg.

Carbon fiber is an advanced material ten times stronger than steel at only a quarter of its weight. CFRP, a composite material made of carbon fiber and plastic, has the added advantage of being highly resistant to deformation and to both acid and alkaline corrosion.

This report studies the global CFRP Recycle demand, key companies, and key regions.
