## Abstracts

The global CGRP Antagonists market size is expected to reach \$ 10000 million by 2029, rising at a market growth of 19.1% CAGR during the forecast period (2023-2029).

The CGRP (calprotectin gene-related peptide) antagonist market is a rapidly growing field focused on developing drugs to treat migraine and other neuropathic pain symptoms. These drugs reduce or prevent migraine attacks by inhibiting the effects of CGRP, providing patients with more effective pain management options. Several CGRP antagonists are already approved and in use on the market, and more new drugs are in development. Growth in this market is driven by expanding patient demand and scientific research, providing hope and an opportunity to improve the quality of life for migraine sufferers.

CGRP (calcitonin gene-related peptide) is a protein released around the nervous system of the brain. CGRP is widely distributed in peripheral neurons and central neurons, and its role is to participate in the process of pain transmission in the nervous system.

This report studies the global CGRP Antagonists production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for CGRP Antagonists, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
