Abstracts

The global Chafing Fuel market size is expected to reach \$ 1917 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032).

Chafing fuel is a fuel used for heating food, typically placed under a chafing dish. It is usually sold in a small canister and burned directly within that canister, with or without a wick. The raw materials of this fuel contain methanol, ethanol, or diethylene glycol, as these may be burned safely indoors, and produce minimal soot or odor. These fuels are also used for emergency heating, outdoor cooking, and fondue.

Global Chafing Fuel key players include Sterno, BLAZE, Lumea, Chef Link, etc. Global top four manufacturers hold a share over 30%.

India is the largest market, with a share about 20%, followed by China, and North America, both have a share about 35 percent.

In terms of product, Ethanol is the largest segment, with a share nearly 20%. And in terms of application, the largest application is Commercial Use, followed by Home Use.

This report studies the global Chafing Fuel production, demand, key manufacturers, and key regions.
