## Abstracts

The global Chain-Disc Feeding System for Livestock Farming market size is expected to reach \$ 617 million by 2032, rising at a market growth of 7.9% CAGR during the forecast period (2026-2032).

In 2025, global sales of chain-disc feeding systems for livestock farming reached 19,000 units, with an average selling price of \$18,500 per unit. Total production capacity stood at approximately 25,000 units, and the gross profit margin hovered around 24%. This product is specialized equipment designed for the automated conveyance of feed in livestock and poultry operations; utilizing a chain-disc mechanism, drive motor, gearbox, support frame, and control system, it delivers feed uniformly and continuously to various feed troughs or feeding points. Suitable for diverse farming models—including poultry (chickens and ducks), swine, and aquaculture—the system effectively reduces labor costs while enhancing feed distribution efficiency and animal health management.

Upstream raw materials primarily consist of high-strength, corrosion-resistant steel, electric motors, and electronic control components, as well as auxiliary materials such as chains, bearings, and sensors. Downstream applications are predominantly found in large-scale farms, smart agricultural and livestock enterprises, and farming cooperatives; typically, these systems are supplied to end-user farming entities by equipment manufacturers or distributors, thereby establishing an integrated supply chain.

Looking ahead, driven by the widespread adoption of smart farming, green agriculture, and digital management practices, demand for highly durable, energy-efficient chain-disc feeding systems capable of remote monitoring is expected to continue its upward

trajectory. Market opportunities will primarily center on the optimization of automated controls, modular expandability, IoT-based monitoring, and energy-saving, eco-friendly designs, enabling enterprises to achieve competitive differentiation through technological upgrades and value-added services.
