## Abstracts

According to our (Global Info Research) latest study, the global Change Data Capture (CDC) Tools market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Data is the foundation of all business. However, constant updates and changes to data also bring challenges, and businesses must adapt to these changes. Whether it's transactions, orders, inventory, or customers, having up-to-date, real-time data is critical to keeping your business running smoothly. When a purchase order is updated, a new customer is added, or a payment is received, applications across the enterprise need to know the information to complete critical business processes.

Change Data Capture (CDC) is a proven data integration pattern for tracking data changes and alerting other systems and services that must respond to these changes. Change data capture helps ensure that all data-dependent systems are in sync and functioning properly.

CDC helps businesses maximize the value of their data by empowering them to use the information for multiple purposes. CDC provides a way to consistently update the same data across data silos, allowing enterprises to maximize data utilization while maintaining data integrity. It can help enterprises make data-driven decisions faster to reduce wasted time, energy and revenue.
