Abstracts

The global Charcoal market size is expected to reach \$ 2721 million by 2032, rising at a market growth of 2.9% CAGR during the forecast period (2026-2032).

Charcoal is a woodfuel consumed in cities and towns. Some of the factors influencing the choice of using charcoal instead of firewood in urban areas include: Charcoal has a higher calorific value per unit weight than firewood, it is therefore more economical to transport charcoal over longer distances as compared to firewood; Storage of charcoal takes less room as compared to firewood; Charcoal is not liable to deterioration by insects and fungi which attack firewood; Charcoal is almost smokeless and sulphur-free, as such it is ideal fuel for towns and cities.

Global key players of charcoal include Kingsford, Royal Oak Charcoal, Duraflame, etc. The top three players hold a share about 33%. North America is the largest market, has a share about 43%, followed by Europe and Asia Pacific, with share 28% and 18%, separately.
