According to our (Global Info Research) latest study, the global Charge-Storage Snap-Off Diodes market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

The charge-storage snap off diode is capable of producing very short pulses. Also known as a step recovery diode, it has a variety of uses as a pulse generator or parametric amplifier in microwave electronics. When the diode switches from forward conducting to reverse blocking, reverse current flows briefly as the stored charge is removed. The abruptness of this reverse current stop is characteristic of step recovery diodes.
