The tea whisk is a tea-making tool made of finely cut bamboo blocks and is used to stir powdered tea. It is an essential tool for making tea. The method of use is that the tea-making chef first uses a tea spoon to put the powdered tea into the Jianzhan, pours in boiling water, and quickly beats it with the tea whisk to produce foam.

The chasen is the most indispensable tool when it comes to making matcha, as none of the alternatives can compete with its ability to evenly mix the tea and create a thick yet fine mousse-like foam. Today, most matcha whisks are mass-produced outside of Japan. However, the highest quality chasen are still painstakingly made from locally grown bamboo in the small village of Takayama in northwest Nara prefecture, where they have been produced for over 500 years.
