Chassis Washing System is an automated device designed specifically for cleaning vehicle chassis. It can effectively remove dirt, oil, salt and other impurities on the chassis, helping to extend the service life of the vehicle chassis. The system uses multiple high-pressure nozzles or rotating nozzles to wash the chassis from different angles. It is particularly suitable for heavy vehicles that require deep cleaning and vehicles that often operate in harsh environments, such as transport trucks, construction machinery and municipal vehicles. The chassis washing system can effectively prevent corrosion and accumulation of pollutants, and plays an important role in maintaining vehicle performance and reducing environmental pollution.
