Abstracts

The global Checkweighers market size is expected to reach \$ 819 million by 2032, rising at a market growth of 1.9% CAGR during the forecast period (2026-2032).

A checkweigher is an automatic or manual machine for checking the weight of packaged commodities. It is normally found at the offgoing end of a production process and is used to ensure that the weight of a pack of the commodity is within specified limits. Any packs that are outside the tolerance are taken out of line automatically. A checkweigher can weigh in excess of 500 items per minute (depending on carton size and accuracy requirements). Checkweighers can be used with metal detectors and X-ray machines to enable other attributes of the pack to be checked and acted upon accordingly.

In Europe market, Checkweighers key players include Mettler-Toledo, Ishida Europe, Minebea Intec, OCS, Bizerba, etc. The top five manufacturers hold a share about 60%. Germany is the largest market, with a share about 22%, followed by France and UK, both with a share about 18 percent. In terms of product, In-Motion Checkweighers is the largest segment, with a share about 85%.
