The global Chemical Canned Motor Pumps market size is expected to reach \$ 761.7 million by 2029, rising at a market growth of 3.8% CAGR during the forecast period (2023-2029).

The Asia Pacific is expected to be the fastest-growing consumption market over the forecast period owing to large investment by the government. This can primarily be attributed to the considerable China market, which contributes significantly to global volume as well as revenue generation. In China market, key players of chemical canned motor pumps include Dalian Huanyou, Teikoku, Shanghai East Pump, etc. Top three players hold a share approximately 45%.

Canned Motor Pump is a centrifugal pump with pump and hermetically sealed electric motor mounted on single shaft thus eliminating the requirement of mechanical seal or other sealing device. Entire rotating assembly is immersed in the liquid, and motor stator and rotor are isolated from the pumped liquid with corrosion resistant, non-magnetic liner and sleeve. A part of the pumped liquid is by-passed through the motor, for cooling of motor and lubricating the bearing.
