According to our (Global Info Research) latest study, the global Chemical Management Services (CMS) market size was valued at USD 3629.6 million in 2023 and is forecast to a readjusted size of USD 5002.4 million by 2030 with a CAGR of 4.7% during review period.

Chemical Management Services (CMS) is a business model in which a customer purchases chemical services rather than just chemicals. These services can encompass all aspects of the chemical management lifecycle including: procurement, delivery/distribution, inventory, use (including chemical substitute research), collection, monitoring/reporting, training, treatment, disposal, information technology, and even process efficiency improvements; each of which poses its own costs and risks. Under CMS, the service provider is compensated based on the quality and quantity of services provided that reduce chemical lifecycle costs, risks, and environmental impacts, not on the volume of chemical sold. Therefore the service provider has the same objective as their customer: to reduce chemical use and cost. Both participants achieve bottom line benefits through reduced chemical use, cost, and waste.

Global Chemical Management Services (CMS) key players include Haas TCM, PPG Industries, Henkel, etc. Global top three manufacturers hold a share over 40%.
