## Abstracts

The global Chemical Sterilization Equipment market size is expected to reach \$ 2407 million by 2032, rising at a market growth of 6.5% CAGR during the forecast period (2026-2032).

Chemical sterilization equipment refers to devices or systems designed to sterilize objects, surfaces, or materials using chemical agents rather than physical methods like heat or radiation. These chemical agents are typically in the form of gases, liquids, or vapors, and they work by disrupting the cellular structures of microorganisms, rendering them incapable of reproduction or causing their death. Chemical sterilization is commonly used in medical facilities, laboratories, and industrial settings to ensure the complete elimination of pathogens, including bacteria, viruses, fungi, and spores, from equipment, instruments, and other items that cannot withstand high temperatures or other harsh sterilization methods.

The core manufacturers in global Chemical Sterilization Equipment market are Steris, Getinge Group, Advanced Sterilization Products, 3M and Shinva Medical Instrument, etc, accounting for 47% market share. Steris is the world's largest Chemical Sterilization Equipment manufacturer, occupying approximately 23% of the market share. From the perspective of product type, Ethylene Oxide Sterilization accounted for a share of 55% in the global Chemical Sterilization Equipment market.
