The global Chemical Storage Services market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Specialty chemical storage has different requirements as compared to that of general warehouses. Hazardous chemicals are flammable liquids or gasses. They are combustible or explosive and pose a significant threat to the health and safety of a workplace. Such nature of these chemicals requires specialty chemical warehousing to store them safely. Production and transportation of hazardous materials (hazmat) are on the rise. Various companies tend to outsource hazmat warehousing and other activities to third-party logistics, considering safety and environmental concerns during hazmat storage.
