Abstracts

According to our (Global Info Research) latest study, the global Chemotherapy At Home Service market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Chemotherapy is a complex medical treatment that involves the use of powerful drugs to kill cancer cells. Traditionally, chemotherapy is administered in a hospital or clinic setting under the supervision of trained healthcare professionals. However, in recent years, there has been a growing trend towards providing chemotherapy at home, when appropriate and safe.

Home chemotherapy services aim to provide patients with the convenience and comfort of receiving their treatments in familiar surroundings. This approach can be particularly beneficial for patients who have difficulty traveling to the hospital or who prefer to receive treatment at home. It can also help reduce the burden on healthcare facilities by freeing up resources for patients who require more intensive care.
