Abstracts

The global Chicory Oil market size is expected to reach \$ 1043 million by 2032, rising at a market growth of 6.5% CAGR during the forecast period (2026-2032).

Global chicory oil sales reached 34,665 tons in 2025, with an average price of US\$18,325 per ton.

Chicory Seed Oil is a 100% natural COSMOS-approved upcycled vegetable oil rich in linoleic acid and omega-6. Produced with BIOLIE's zero-waste patented enzymatic extraction technology, this oil is extracted from chicory seeds with no germination power.

Chicory oil (primarily roasted root oil) is made from the taproots of chicory (*Cichorium intybus* L.). Harvested in autumn, the roots are washed, sliced, and dried at 60-70°C until the moisture content is 8%. They are then drum-roasted at 180-220°C for 40-60 minutes to develop a coffee-caramel color and aroma. Finally, the oil is extracted by hydraulic pressing or hexane extraction. The oil content of the dried roots is 2.5-3.5%, with a yield of approximately 120-150 kg of dried roots per mu (approximately 0.067 hectares), yielding 3-5 kg of oil per mu. The price for dried roots from farmers is USD 1.8-2.2/kg. Raw material costs account for 35-40% of the ex-factory price. Including roasting energy consumption, solvent recovery, and refining, the total processing cost is approximately USD 10-12/kg.
