Abstracts

The global Children Mosquito Repellent Bracelet market size is expected to reach \$ 168.8 million by 2029, rising at a market growth of 6.1% CAGR during the forecast period (2023-2029).

The driving factors for the development of children's mosquito repellent bracelets mainly include the following aspects:

Promoted by consumer groups: Children are one of the important consumer groups for mosquito repellent bracelets. Because children's skin is relatively delicate, using traditional mosquito repellent products may have an impact on children's health. Mosquito repellent bracelets can prevent this from happening.

Driven by consumer demand: As climate change and environmental pollution intensify, the number of mosquitoes is gradually increasing, so people's demand for mosquito repellent products is also increasing. In addition, with the improvement of health awareness, people's demand for environmentally friendly and healthy mosquito repellent products is also increasing.

Driven by consumer trends: The future development trend of the mosquito repellent bracelet market will be environmentally friendly, healthy, efficient and convenient. Among them, environmental protection and health are one of the future development directions of mosquito repellent products, while efficiency and convenience are one of the important factors for consumers to choose mosquito repellent products.
