Chinese Medicine Injections for Cardiovascular Diseases are sterile injectable formulations derived from traditional herbs known for promoting blood circulation, replenishing Qi, and nourishing Yin. They are primarily used as adjunctive therapies for conditions such as coronary heart disease, angina pectoris, and heart failure. These injections work through multiple mechanisms, including dilating coronary arteries, improving microcirculation, and exhibiting antioxidant and anti-inflammatory effects. Commonly used herbs include *Salvia miltiorrhiza* (Danshen), *Carthamus tinctorius* (safflower), and *Panax ginseng*, with active compounds like tanshinones, flavonoids, and saponins demonstrating defined pharmacological actions. While some products have shown preliminary efficacy and safety in clinical studies, further research is needed to establish comprehensive clinical evidence, standardize usage, and enhance therapeutic outcomes.
