According to our (Global Info Research) latest study, the global Chip Breaker Insert market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A chip breaker insert is an insert designed with a chip breaker. Chip Breaker is a smart solution for chip breaking during the turning process. A chip breaker is a critical feature found on cutting tools, particularly those used in machining processes such as turning, milling, and drilling. It is pivotal in chip control and management during metalworking operations. By interrupting and controlling the formation of chips, the chip breaker enhances machining efficiency, surface finish quality, and tool life. Its primary purpose is to prevent the chips from becoming unmanageably long, tangled, or causing damage to the workpiece or the cutting tool itself.
