Chitin powder is a natural organic compound extracted from the exoskeleton of crustaceans and the cell wall of fungi. It is mainly composed of polyglucosamine (D-glucosamine) and N-acetylglucosamine, and has multiple biological activities and a wide range of applications. The application of chitin powder in the medical field includes the preparation of drug sustained-release systems, wound dressings, bone repair materials, etc. In the food field, it can be used as a food additive with antibacterial, fresh-keeping, thickening and other functions. In the cosmetics field, it can provide skin moisturizing, anti-oxidation and other effects. The production process of chitin powder mainly includes extraction, alkali treatment and decolorization. The extraction process generally uses crustacean exoskeletons as raw materials, such as shrimp, crab, shellfish, fungi, etc. Through these steps, high-purity chitin powder can be obtained.
