Abstracts

The global Chlorinated Polyethylene Rubber (CPE) market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Chlorinated polyethylene (CPE) is a saturated polymer material with a white powder appearance, non-toxic and odorless, and has excellent ozone resistance, weather resistance, color stability, chemical resistance, oil resistance and flame retardancy. Mechanical properties such as flex resistance and wear resistance are also very good. Chlorinated polyethylene rubber is mainly used as a special synthetic rubber. Chlorinated polyethylene rubber can also be used as a modifier for synthetic rubber and a plasticizer for plastics such as PVC. Its non-vulcanized products can be used as magnetic rubber, etc. In addition, chlorinated polyethylene can be used together with general-purpose rubber such as styrene-butadiene rubber to obtain a low-cost rubber compound with excellent performance.

This report studies the global Chlorinated Polyethylene Rubber (CPE) production, demand, key manufacturers, and key regions.
