Abstracts

According to our (Global Info Research) latest study, the global Chloromethyl Methyl Ester market size was valued at US\$ 213 million in 2025 and is forecast to a readjusted size of US\$ 284 million by 2032 with a CAGR of 4.2% during review period.

Chlorinated methyl ester generally refers to chlorinated methoxy fatty acid methyl ester, a type of synthetic plant ester. The product is derived from natural oils and is produced through esterification under the action of a series of catalysts. It is a new type of environmentally friendly and non-toxic plasticizer. This product overcomes the main problems of existing epoxy plasticizers, such as low addition amounts and easy oil exudation. The product does not contain harmful heavy metals or phthalates, and is a cost-effective alternative to DOP-type plasticizers.

The upstream segment consists of basic raw materials and synthesis processes, mainly including natural oils and fats such as vegetable oils/animal fats (e.g., soybean oil, palm oil), as well as basic chemical raw materials such as methanol and chlorine. Global sales in 2024 were approximately 228,000 tons, with an average market price of approximately US\$907 per ton. The industry's gross profit margin is in the range of 15%?30%.

Driven by environmental regulations, the chlorinated methyl ester industry has clear development prospects, supported by stable demand stemming from the expanding applications of PVC products. Increasingly stringent environmental and safety regulations globally (such as REACH and RoHS) are prompting downstream companies to seek and utilize more environmentally friendly plasticizer alternatives like chlorinated methyl esters, directly creating a growing market. However, the industry also faces

intense market competition and pressure from technological advancements, including the threat of substitution from environmentally friendly plasticizers developed through other technological routes. This requires companies to continuously invest in research and development to maintain competitiveness.
