Abstracts

Chopped recycled carbon fiber provides high performance and is considered as a good reinforcing fiber for thermoplastic resins, cements, elastomers and coatings. It has high strength and modulus, low density, dimensional stability and low thermal expansion, and it also provides savings Cost benefits. Chopped recycled carbon fibers have higher structure and electrical conductivity, and are superior to abrasive fibers. Recycled carbon fibers are widely used in the automotive and transportation industries due to their light weight and high tensile strength.
