## Abstracts

According to our (Global Info Research) latest study, the global Chromatography Syringes market size was valued at US\$ 43.8 million in 2024 and is forecast to a readjusted size of USD 54.2 million by 2031 with a CAGR of 3.1% during review period.

In liquid chromatography, the syringe functions primarily as a pipette or liquid-transfer device that loads a sample loop. The same largely holds true for gas chromatography. The syringe generally does not take an active role in injection, which occurs only after the sample has been displaced from the syringe. Syringes are gas-tight and leak-proof.

The major manufacturers in the global Chromatography Syringes market are Hamilton Company, SGE, Thermo Scientific, etc., and the top three manufacturers account for about 65% of the market share.

North America is the largest Chromatography Syringes market with approximately 40% market share, followed by Europe with approximately 35% market share.
