Chrome-Free Dacromet Coating Service refers to outsourced corrosion-protection processing where chrome-free zinc-flake (Zn/Al flake) coating systems are applied—typically by dip-spin or spray followed by thermal curing—to create a thin, dense protective film delivering strong salt-spray performance and controlled assembly behavior; the service is commonly delivered by licensed/approved applicators under coating-system providers' technical specifications to ensure process control and consistent quality. Chrome-Free Dacromet Coating Service is typically priced on a per-kilogram basis, with costs influenced by part size and geometry, corrosion-resistance grade, and friction-control requirements, and is generally positioned above conventional zinc plating but below premium multi-layer corrosion-protection services.
