Abstracts

The global Chronic Wound Dressing market size is expected to reach \$ 5951 million by 2032, rising at a market growth of 3.7% CAGR during the forecast period (2026-2032).

Chronic wound dressings refer to functional medical dressings used for long-term non healing or slow healing wounds, mainly serving diabetes foot ulcers, pressure injuries, venous ulcers, arterial ulcers, postoperative wounds that are difficult to heal, tumor ulcerated wounds, residual wounds after burns and burns, and elderly chronic wound care. Common products include foam dressings, hydrocolloid dressings, gel dressings, alginate dressings, etc. Its core function is to absorb and manage exudate, maintain a moderately moist environment, reduce the risk of infection, protect fragile skin, reduce dressing pain, and promote granulation tissue formation and wound healing. In 2025, global Chronic Wound Dressing production reached approximately 1,576 M Pcs, with an average global market price of around US\$ 3.85 per Pcs.

The market growth of chronic wound dressings mainly comes from the deepening of aging, the increase of patients with diabetes, the increase of chronic vascular diseases, the expansion of long-term care needs and the popularity of home dressing changing scenes. Compared with ordinary gauze and basic dressings, chronic wound dressings emphasize more on wet healing, exudation management, antibacterial control, pain relief dressing change and skin protection. Therefore, the use proportion of foam dressings, alginate dressings, hydrocolloid dressings, silver ion dressings and composite absorption dressings in hospital and out of hospital care has continued to increase. The hospital side pays more attention to clinical efficacy, infection control, absorption capacity, and reduced frequency of dressing changes, while the home care side places more emphasis on convenience, comfort, waterproofing, breathability, and specification adaptation. Future opportunities focus on high absorption foam dressings,

antibacterial chronic wound dressings, diabetes foot dressings, pressure injury care dressings, collagen and bioactive dressings, negative pressure treatment matching dressings and home chronic wound care kits.
