According to our (Global Info Research) latest study, the global CI-CD Automation Tool market size was valued at US\$ 5128 million in 2025 and is forecast to a readjusted size of US\$ 10697 million by 2032 with a CAGR of 12.8% during review period.

CI-CD (Continuous Integration/Continuous Delivery/Continuous Deployment) automation tools are a set of development and operation tools used to automate the full workflow of software development. They enable automatic code merging, compilation, testing, packaging, release and deployment after developers submit code. These tools streamline the software delivery pipeline, reduce manual errors, shorten release cycles, and support frequent, reliable iteration of applications in DevOps workflows.

The global market for CI/CD (Continuous Integration/Continuous Delivery) automation tools is experiencing robust, double-digit growth, driven by the universal adoption of DevOps practices, the shift to cloud-native architectures, and the need for faster, more reliable software delivery.

North America: The largest market, led by the U.S. Strong concentration of cloud-native enterprises, hyperscale providers (AWS, Azure, GCP), and leading DevOps vendors.

Asia-Pacific (APAC): The fastest-growing region. Rapid digital transformation across China, India, Japan, and Southeast Asia, fueled by increasing IT spending and SME adoption of DevOps practices.

Europe: The second-largest market. Growth is driven by digital transformation initiatives and stringent regulatory requirements like the EU Cyber Resilience Act, which

mandates automated security testing and SBOM generation.
