Abstracts

The global Circline Fluorescent Tube market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

A Circline fluorescent tube, also known as a ring fluorescent tube or circular fluorescent lamp, is a type of fluorescent light bulb that features a circular shape. Unlike traditional linear fluorescent tubes, Circline tubes have their electrodes positioned at both ends of the circular tube, and the light is emitted radially from the tube's surface.

Circline fluorescent tubes are commonly used in ceiling fixtures, wall sconces, and other lighting fixtures where a circular shape is desired or where a unique lighting design is required. They are often chosen for their distinctive appearance and even illumination
