According to our (Global Info Research) latest study, the global Circuit Breakers market size was valued at USD 18420 million in 2023 and is forecast to a readjusted size of USD 26370 million by 2030 with a CAGR of 5.3% during review period.

Circuit breaker is an automatically operated electrical switch designed to protect an electrical circuit from damage caused by overload or short circuit. Its basic function is to detect a fault condition and interrupt current flow. Unlike a fuse, which operates once and then must be replaced, a circuit breaker can be reset (either manually or automatically) to resume normal operation. Circuit breakers are made in varying sizes, from small devices that protect an individual household appliance up to large switchgear designed to protect high voltage circuits feeding an entire city.

Global Circuit Breakers key players include Schneider Electric, ABB, General Electric, Alstom, Eaton, etc. Global top five players hold a share about 35%.

North America is the largest market, with a share about 20%, followed by Europe and China, having a total share about 70 percent.
