Abstracts

Circulating tumor cells (CTCs) are tumor cells that detach from the primary tumor and travel in the bloodstream, spreading from the original tumor to other locations, leading to cancer metastasis. These cells exist in peripheral blood of cancer patients and detection of CTCs can help to determine the process of metastasis. In contrast with other blood cells, the number of CTCs is very rare in blood which makes them difficult to detect.

Cancer stem cells (CSCs) are cancer cells that have all the classical properties of normal stem cells. Specifically, they are able to both give rise to more copies of themselves and to give rise to all cell types found in the cancer.

Scope of the Report:

This report studies the Circulating Tumor Cells (CTCs) and Cancer Stem Cells (CSCs) market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Circulating Tumor Cells (CTCs) and Cancer Stem Cells (CSCs) market by product type and applications/end industries.

According to the research, the most potential market in the main countries of circulating tumor cells (CTCs) and cancer stem cells (CSCs) industry is China, determined by the rising level of medical care. Besides, South America, Asia-Pacific should also be focused by the investors. They are the potential consumers of circulating tumor cells (CTCs) and cancer stem cells (CSCs).

The CellSearch test is the only FDA-approved test for CTC assessment. For the moment, the products are not comprehensive, and technologies are not stable. Morbidity and mortality rate of cancer is rising at a faster speed worldwide and thus

prevention of cancer and cancer treatment is grabbing attention of cancer researchers globally. Stem cells and cell therapy have shown significant potential to treat cancer effectively.

The global Circulating Tumor Cells (CTCs) and Cancer Stem Cells (CSCs) market is valued at 6420 million USD in 2017 and is expected to reach 21700 million USD by the end of 2023, growing at a CAGR of 22.5% between 2017 and 2023.
