## Abstracts

According to our (Global Info Research) latest study, the global Citrus Oils market size was valued at USD 3203.8 million in 2023 and is forecast to a readjusted size of USD 3900.7 million by 2030 with a CAGR of 2.9% during review period.

Citrus oils are used to add sweet, refreshing flavor to beverages like tea, water, or smoothies, and enhance recipe for baked goods like scones, muffins, or cookies. Citrus oils can also be useful for adding flavor to yogurt, and to your beloved dips and salsa recipes. Citrus oils are mainly considered for using citrus oils in recipes that call for lemon, lime, orange, or tangerine zest. If the recipe calls for the zest of the entire fruit, it will likely take a few drops of essential oil to match the amount of flavor needed. Citrus essential oils are taken from the peel of the fruit—not the juice. For this reason, it is easy to substitute citrus oils for recipes that call for fruit zest, but not necessarily for recipes that call for fruit juice.

Therapeutics application uses wide quantities of citrus oils, essential oils contain relatively large amounts of citrus oil. Growing consumer interest in aromatherapy directly contributes to the revenue increase in the therapeutic massage oils segment and is therefore an important driver for the growth of the global citrus oils market. The other factor is that essential oils are priced much higher than all other products in which citrus oils are included as an ingredient. This higher price is responsible for collecting huge revenues for the global citrus oils market.
