The global Civil Counter UAS market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Civil Counter UAS are technologies and devices used to detect, identify, jam or neutralize unauthorized, potentially threatening drones. These systems are designed to protect public safety, privacy and safety-sensitive areas, preventing unauthorized drones from entering and potentially causing harm. Because civilian areas are densely populated, for security reasons, such systems are usually soft-killing, with electronic interference as the main method.
