## Abstracts

The global Civilian Turboshaft Helicopter market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Civilian Turboshaft Helicopter are rotor aircraft used for non-military purposes. They are aircraft used by civilian aviation and private companies to transport passengers. This category also features helicopters for government institutions, emergency services and hospital services. A turboshaft engine is a variant of a jet engine that has been optimised to produce shaft power to drive machinery instead of producing thrust. Turboshaft engines are most commonly used in applications that require a small, but powerful, light weight engine, inclusive of helicopters and auxiliary power units.
