Abstracts

According to our (Global Info Research) latest study, the global Clean Energy Tax Credit Transferability Services market size was valued at US\$ 6484 million in 2025 and is forecast to a readjusted size of US\$ 11351 million by 2032 with a CAGR of 8.3% during review period.

Clean Energy Tax Credit Transferability Services are a suite of specialized, compliance-driven professional and financial services that enable the legal monetization of eligible clean energy tax credits, primarily established under the U.S. Inflation Reduction Act (IRA) of 2022 via Internal Revenue Code (IRC) Section 6418. This landmark provision allows eligible taxpayers (credit sellers, typically clean energy project owners/developers with insufficient federal income tax liability to fully utilize their earned credits) to sell all or a pro rata portion of their clean energy tax credits to unrelated, taxable third parties (credit buyers, profitable entities seeking to reduce their federal income tax liability) in exchange for upfront cash. Critically, the cash consideration is excluded from the seller's gross income and is non-deductible for the buyer per IRS final regulations.

Prior to the IRA, clean energy tax credit monetization was largely limited to complex, high-barrier tax equity partnership structures, which were inaccessible to most small and mid-sized developers, distributed generation project owners, and non-specialized entities. Transferability services democratize this monetization by streamlining the end-to-end transfer process, ensuring strict adherence to IRS rules (including mandatory pre-filing registration), mitigating tax, legal and operational risks for both counterparties, and matching sellers with qualified buyers to maximize value for all parties.
