Cleaning grease is a cleaning product used to remove surface grease, oil, dirt, and other contaminants. Grease is a viscous oily substance that can accumulate on the surfaces of engines, machinery, and kitchen utensils, making it difficult to clean with regular soap and water. Cleaning grease products are specifically designed to decompose and dissolve grease, making it easier to wipe or rinse. They are usually formulated with solvents or surfactants that can penetrate and loosen the surface of oil. Cleaning grease is an important step in maintaining the performance and appearance of equipment and machinery, as well as in keeping the kitchen and other areas clean and hygienic.
