Clear roof coating is a type of protective coating applied to roofs to provide various benefits. Clear roof coatings act as a barrier, protecting the roof from UV radiation, rain, snow, hail, and wind. This helps prevent premature aging, cracking, and deterioration of the roof material, thereby extending the life of the roof. Some clear roof coatings are designed to reflect sunlight and reduce heat absorption. This can lower the temperature inside the building, reducing the need for air conditioning and potentially saving energy and reducing utility costs.
