According to our (Global Info Research) latest study, the global Climate Ceilings market size was valued at USD 791.8 million in 2023 and is forecast to a readjusted size of USD 1335.3 million by 2030 with a CAGR of 7.8% during review period.

Climate Ceilings, also known as radiant ceilings, can both be used for heating and cooling. Creating the perfect indoor climate all over the building, both in cold north sides and warm south sides at the same time, can be a challenge. Especially spring and fall with a lot of sun and cold winds can be a factor that changes the indoor climate of the building. Ceiling panels are heated in one of three ways: water pipes, electric or air flows embedded in the panel. Of these three, electric circuits and water pipes are the most used solution.

Global key players of climate ceilings include Zehnder Group, Uponor, SAS International, Swegon, Interalu NV, etc. The top five players hold a share over 30%. Europe is the largest producer, has a share about 85%, followed by North America, with share 11%. Europe is the largest market, has a share about 83%, followed by North America, and Asia-Pacific, with share 12% and 4%, separately.
