According to our (Global Info Research) latest study, the global Clopidogrel market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Clopidogrel, sold as the brandname Plavix among others, is an antiplatelet medication that is used to reduce the risk of heart disease and stroke in those at high risk. It is also used together with aspirin in heart attacks and following the placement of a coronary artery stent. It is taken by mouth.

Clopidogrel has remained, ever since its first approval in 1997, the antiplatelet therapy of choice among physicians for the treatment of patients with conditions such as acute coronary syndrome or percutaneous coronary intervention. The drug was the first thienopyridine to hit the market, which gave it an excellent head start over a number of drugs for these conditions that are either available in the market or are in clinical trials. As a result, the drug did not face much competition and has taken over the global market, with its array of application constantly expanding.

The Global Info Research report includes an overview of the development of the Clopidogrel industry chain, the market status of Hospitals (25mg, 75 mg), Private Clinics (25mg, 75 mg), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Clopidogrel.
