According to our (Global Info Research) latest study, the global Closed Suction System market size was valued at USD 154.2 million in 2023 and is forecast to a readjusted size of USD 194.1 million by 2030 with a CAGR of 3.3% during review period.

Closed tracheal suction system (CTSS) permits the health care providers to perform suctioning several times without disconnection from ventilator, thus, it decreases hypoxemia and infection rate.

In CTSS, the catheter is part of the ventilator circuit which is a sterile, closed, in line suction catheter to the ventilator circuit allowing passage of suction catheter through the artificial airway without disconnecting the patient from the ventilator during suctioning. It is introduced into the airways through a one way valve. This system can stay for as long as 24 hours or as per the manufacturer's instructions. This type of suction system has comparatively fewer physiological disturbances and provides ease of use given that only operator is required for suctioning.

The Closed Tracheal Suction System industry can be broken down into several segments, Size Fr/Ch: 10, Size Fr/Ch: 12, Size Fr/Ch: 14, Size Fr/Ch: 16, Others, etc.

Avanos is the largest manufacturer of the closed suction system in the world, has a market share about 50%, followed by Smiths Medical with about 10% share.
